BARRIERFOLD BI-FOLD DOOR HARDWARE

Bi-Folding Door Hardware For Timber Doors

Barrierfold is a top-hung hardware system for 35-56mm timber bi-folding doors.

Large openings can be filled as the maximum sash size is 1000mm wide x 3300mm high, subject to a maximum sash weight of 90Kg. Its hinge and wheel carriage components are brushed stainless steel, with durable nylon wheels for a smooth and quiet operation. Wheels and guides run in an aluminium track and bottom guide channel, sleeved with pvc.

The system provides adjustment at every hanger and pivot point, and the hinges are in-line across the whole face of the door, unlike on some systems.

Security is achieved through the new range of flush bolts in attractive 'satin nickel' finish. The range includes 210mm, locking and non-locking, 400mm for high doors and cranked for inward opening doors.

A polished brass finish on all hardware will be available during 2011.

Manufacturers are free to use their own locking system on the master leaf, but the optional Barrierfold Hybrid stainless steel lock set (including cylinder) provides security and +/-8mm lateral adjustment to allow for expansion and contraction.

Key Benefits

- Top hung system
- 90 Kg sash weight
- Max 1000mm width/3300mm height
- Slimline stainless steel components
- All hinges are inline across door face
- Secure & attractive finger bolts
- Polished brass option from 2011
- Optional Hybrid door lock (92PZ)
