

PRODUCT BULLETIN

Anti-Bump/Snap/Drill/Pick Profile cylinder

Millenco Magnum 12 Pin Snap - Safe Profile Cylinder

Magnum is a premium quality product which features protection against practically all of the methods currently used to bypass a profile cylinder, namely bumping, snapping and extraction, drilling and picking.

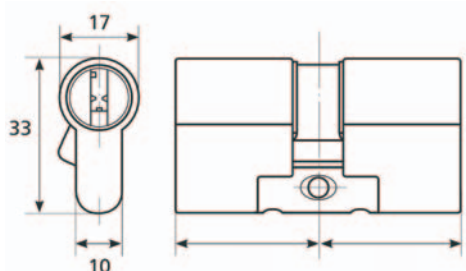

Magnum is Kitemark approved. It has been tested and accredited to BS EN 1303:2005 and carries the classification 16000C62.

The cylinder is produced in bright nickle or polished brass finishes.

Magnum is unhandes as it has full protection on both ends.

- Anti-Bump: Magnum features 'V-Pins' on both ends to resist bumping
- Anti-Snap: The cylinder is fixed into the lock through a steel tubular bar, significantly strengthening what is traditionally a weak point around the fixing screw.
- Anti-Drill: Magnum is protected against drilling by anti-drill pins and balls on both ends
- Anti-Pick: Four special anti-pick pins on each end resist picking
- Kitemark approved with BS EN 1303:2005 accreditation
- Sacrificial break points for double extraction protection
- Full protection both ends
