MILLENCO MANTIS 3

Multi-point lock for Timber & Composite Doors

Mantis 3 offers a solution for composite or flush timber doors where a roller cam is not required, or cannot be accommodated. The combination locking points feature only the hook and tapered deadbolt, and work with individual adjustable keeps.

The unsprung lock is supplied in a choice of 35 or 45mm backsets and 16 or 20mm steel face plate options. The 20mm face plate is radiused at both ends, so the groove need not be run the full length of the door edge.

If preferred, fabricators can opt for the 44mm aluminium faceplate option that completely spans the edge of the door leaf. This, coupled with the sculptured hinge cover plate on the door's rear edge, makes for a very tidy finish. The hinge cover plate is notched to accept 3 Elevator 2D adjustable door hinges.

Features and Benefits of Mantis 3 Locks for Timber and Composite doors:

- 92/62 PZ allows lever/lever or lever/pad operation
- Hook/deadbolt combination locking points
- 25mm 'deep throw' hooks
