NEW greenteQ ALPHA HANDLE

Casement Handle

greenteQ Alpha is a premium quality push to open handle for PVCu, timber or aluminium outward opening windows.

Its 7mm square spindle makes it compatible with all popular spindle drive shootbolts and espagnolettes, whilst a variety of standard spindle lengths ensures quick fitting on most window profiles currently used in the UK.

Alpha's zinc die-cast base material provides a good quality, 'weighty' feel prior to fitting and a choice of white, black, satin and polished chrome and PVD and polished gold finishes, all with colour co-ordinated screw cover caps, ensures that it complements any window.

Not only does it look good in the factory, but 240 hours (plated finishes) and 500 hours (painted finishes) neutral salt spray corrosion resistance performance figures ensure that Alpha still looks good

after many years use.

Delivered in sturdy 'easy to handle and store' boxes of 25, Alpha is available in a choice of inline or offset designs and in cylinder locking, non-locking or egress options.

- greenteQ brand ensures premium quality
- Sleek and stylish handle grip suites well with other contemporary-design products
- 90° stop / click location washer
- Supplied as a complete set, including handle, cover caps, key (where required) and fixings
- Colour coded inner packaging for easy identification on the work bench (blue for left, red for right and clear for inline)
