## NEW greenteQ Kappa Door Knockers & Viewers

### Door Furniture

greenteQ Kappa door knockers have been designed with good looks, strength, fitter and user friendliness in mind.

The key feature is the 'snap-lock' fitting method that significantly cuts the assembly time. Simply attach the fixing bracket to the door face (using fasteners appropriate to the door material), then clip the knocker onto the bracket for a secure, permanent fit. Not only is this great for the door manufacturer, but the end user benefits from not having unsightly capping nuts on the internal face of the door, which carry the risk of rust staining if the threaded fixing bar is made of steel, as is often the case.

Kappa knockers are available in Classic and Slim Urn

designs with or without a cut-out for the Kappa 160° Door Viewer.

Kappa knockers are available in PVD gold, polished chrome, white and black, and colour match perfectly with all other greenteQ door and window furniture products.

#### Benefits at a glance:

- 'Snap-lock' fixing method
- Part of the greenteQ colour-matched suite
- Robust, yet attractive
- Classic or Slim options, with or without cut-out
- Optional Door Viewer for 35-85mm thick doors

## greenteQ Kappa 6" Classic Urn Door Knocker
