## greenteQ Epsilon Window Espagnolette

### Window Espagnolette

VBH has introduced the greenteQ outward opening window espagnolette for those fabricators who want to fit a top quality product to their trade or above ground floor windows but don't wish to pay a premium for a more 'established' brand name.

As with all greenteQ products, Epsilon is manufactured to a very high standard but we are able to keep the price as low as possible as we don't need to invest heavily in promoting the brand.

The espag is silver passivated and has a flat 16mm faceplate to fit in a standard Eurogroove. The gearbox is an 'inline type' and is available in the usual 20 or 22mm backset variants required on

most profiles.

Locking is achieved through 2 or 3 (depending on length of espag) fully adjustable mushroom bolts that come in a choice of 8 or 9mm heights. Again, the choice depends on the profile system being used. These mushroom bolts locate into 2-stage striker plates to provide 'closed' and 'night vent' positions.

The espagnolette is available from stock in 6 lengths, starting at 250mm and going up to 1200mm.

VBH order codes can be found overleaf.
